PTO 1999 Exam Preparation Is Too Important To Trust To Anyone But *Professor Kayton*

115 Of His Successful 1997 PTO Exam Alumni Explain Why

1. This was money well spent!! I was a bottom half student at a mid-tier law school. Yet, because I passed the patent bar the first time while still in school, I got a job immediately! And at a higher salary than any of my classmates! This happened despite the fact that I had never even seen a patent in my life until I took your course!!! The lecture chart notes were my primary reference during the patent bar. I will sing your praises loud and clear!!
2. *I am an ex-academic scientist who, after taking your course, passed the exam the first time having had no legal or other patent experience. Thank you!*
3. I found all aspects of your course to be fantastic and effective. The course materials were clear, complete, and at the right level of detail. The instructors were knowledgeable and presented the materials very clearly with relevant examples. I followed your plan and I passed the first time around even with the exam format change. I will and have recommended your course to anyone preparing to take the exam.
4. *I didn't know anything about patent law when I started, but your program gave me what I needed to pass the exam! I liked the fact that you taught the underlying substance and not just exam tricks.*
5. Until I read *Patent Practice* and attended the lectures, §102 was very unclear. I also did the West Bar [Longacre/White] home video. It was full of errors and contradictions. I will recommend your bar review course; it was the difference between a pass and a fail.

6. *The faculty almost knew what was going to be on the exam and prepared us accordingly. Thank you Prof. Kayton.*
7. Before the course I had no exposure to patent law. The course gave me enough background to enable me to study and pass even though I only had one month to read and learn enough to pass the exam. Kayton himself is entertaining and inspires confidence.
8. *What I liked best was Professor Kayton's analysis for the actual patent bar exam problems.*
9. I can't say enough about the excellence of those home study materials. They not only focused on the material that would be on the exam but they also will become a valuable part of my patent practice. The material was so well written that I was actually able to casually study at times and still retain the knowledge. I was so excited that I was able to get the practice answers correct 7 - 9 times in 10! Whatever you're doing you're doing it right. Don't make any drastic changes! Bravo!
10. *The Kayton class was worth every penny!*
11. The course and textbooks were well coordinated. Most of the lecturers had a good sense of humor - necessary for surviving the long days. The course was designed well enough to allow a non-lawyer like me to learn what was necessary.
12. *The emphasis on underlying rationale - and the excellent and comprehensive written materials - are key to the PRG class's effectiveness.*

Professor Kayton's 1999 PATENT BAR REVIEW

CONTINUED FROM FRONT COVER

13. The instructors were top rate and only delved into each topic enough to make sure they communicated what was needed to pass the exam – no more, no less. I've recommended your course to everyone who approaches me about the exam!

14. *Course was well organized and well-run. Course materials and class were great.*

15. Best: Kayton's lectures. The lecture chart handouts – I used them to study for the exam and consulted them during the exam.

16. *Overall the course was excellent. The materials and recommended study regimen were the best part of the course.*

17. Without Kayton's course I never would have passed the first time.

18. *I am particularly impressed with the way that the written materials were organized. They gave me a superb overview of the law in this area and made it possible for me to study the substantive and procedural concepts (mostly for the first time) and to take and pass the exam with confidence.*

19. PRG's course and study materials were absolutely invaluable. Because of PRG's lucid instructional materials and top-flight instructors, I succeeded in passing the exam on my first attempt. I am deeply indebted to Professor Kayton, the instructors, and the PRG crew.

20. *Course materials are very user friendly. They are the first reference I use when I now have a patent law issue in practice.*

21. By preparing for the PRG course as instructed I was fully prepared to pass the exam the first time. The written materials and instructors were excellent. I recommend your course to every potential course attendee I meet!

22. *I highly recommend the course to others who ask for my advice.*

23. Class materials provide a good quick reference during the exam.

24. *This course was excellent.*

Our Focus Is On Your Success

If you register for one of our 1999 Courses, and then pass any of the 1999 or 2000 Exams on the first attempt, we will award you your preference of –

- a \$300 personal Gift Certificate toward any Patent Resources Group® Course, valid for 18 months, or
- a check for \$100!

Every detail was considered and addressed. The written material was the best security blanket available. Each of the instructors was open and available for questions. There was no part of the experience that was unpleasant.

25. Course was well-taught, well-focused and generally excellent.

26. *Excellent insight into Examination answers sought by PTO.*

27. I liked reading each chapter in the treatise, and following each chapter while attempting each question (in vols. 7/8). The treatise is excellent! The explanations given with each answer were also tremendously helpful.

28. *The quality of the material provided and the professionalism of everyone associated with PRG was the best.*

29. Well organized and well run. A long week packed with useful learning and insights.

30. *I passed the exam based mostly on what I learned in the class. This should be the only course offered. I studied with IPS and did not pass. Would recommend this to everyone.*

31. The facilities and organization were excellent. I was glad to see such a large amount of material concisely presented in a short amount of time.

32. *I thought the materials were the best part of the course. I did about half of the study questions before the course (right after reading each chapter) and the other half after the course. When I took the exam, I didn't need my MPEP and only used it to answer a few questions – mostly I just double-checked answers.*

33. The reference materials are excellent. Now that I've passed, I use them all the time in practice!
