I. Taking Invention Disclosures
   A. Preparing for the Interview
   B. Determining Inventorship and Ownership
   C. Timeline of the Invention
   D. Understanding the Invention and Points of Novelty
   E. Bar Dates and Filing Deadlines
   F. Clarifying Terms of Representation

II. Claim Drafting Basics
   A. Purpose of Patent Claims
   B. Types of Claims
   C. Claim Structure
   D. Apparatus, Method and Composition Claims
   E. Patentability – Novelty
   F. General Claim Drafting Strategies
   G. Independent and Dependent Claims
   H. Organizing Claim Sets

III. Drafting the Specification
   A. Written Description Requirement
   B. Enablement Requirement
   C. Best Mode Requirement
   D. Parts of the Specification
   E. Drafting the Detailed Description
   F. Disclosure Dedication
   G. Advantages of the Invention
   H. Single Embodiment Specifications
   I. Avoiding Harmful Statements
   J. Specification in Software Inventions
   K. Patent Drawings

IV. Claim Drafting Pitfalls
   A. Claim Drafting Tips
   B. Preambles
   C. Selecting Claim Terms
   D. Consistent Claim Terminology
   E. Claim Brevity
   F. Conducting a Pre-Filing Prior Art Search
   G. Claim Construction
   H. Functional Claim Language
   I. Definiteness
   J. Product-by-Process Claims
   K. Drafting for Infringement

V. Breakouts – Claim Drafting Strategies by Technology
   A. Chemical/Biotechnology
   B. Mechanical
   C. Electrical/Computer Science
VI. Developing a Prosecution Strategy
A. Provisional Applications
B. PCT Applications
C. CIP Applications
D. Prosecution Limiting Statements
E. Inequitable Conduct and Duty of Candor
F. Preserving Doctrine of Equivalents
G. Preserving Patent Term Adjustment
H. Drafting Patents for Litigation
I. Robust Claim Sets
J. Drafting Specification
K. Prosecution Strategies
L. Prior Art Searching
M. Patent Ownership

VII. Ethics
A. IDS Practice and Duties of Candor and Disclosure
   A. Duty of Disclosure
   B. Materiality
   C. Content Requirements
   D. Timing Requirements
   E. Filing Considerations
   F. Examples

B. Ethical considerations for patent practitioners
